### DETAILED ACTION

1. Applicant's affirmed election of Group I invention, claims 1, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Therefore, in view of lack of traversal to restriction requirement set forth from Response to Restriction Requirement, the restriction set forth by the examiner is deemed proper and is therefore made Final.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Mashelkar et al. (US 5,780,578).

*The invention of claim 1 relates to a **cobalt imprinted polymer composition** useful for the **selective removal of cobalt**, having general formula (1)*

wherein

***A is any vinyl monomer containing hydroxyl group,***

***B is any vinyl monomer bearing acidic group,***

***C is any vinyl monomer containing an amino group and***

***D is a cross linker bearing vinyl group and***

*x, y, z and f are the mole fractions of A, B, C and D respectively in the final polymer and vary such that  $0 < x, y, z < 1$  and  $f$  can vary between 0 and 1 and  $x+y+z+f = 1$ .*

Mashelkar et al. (col. 2, line 34-59 ; col. 5, line 61 to col. 11, line 43) disclose a polymer composition comprising components A, B, C, and D as claimed. Since Mashelkar et al. (Figure 1) clearly shows that cobalt complexes can be formed from the composition as claimed, the examiner has a reasonable basis that the claimed "for the selective removal of cobalt" is inherently possessed in Mashelkar et al. In view of the reasons set forth above, claim 1 is anticipated.

Further, regarding the claimed "for the selective removal of cobalt", applicants must recognize that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as

compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).
